

TROXLER ANNOUNCES OPENING OF AUTHORIZED REPAIR AND SERVICE CENTER *Southern California-based Southwest Calibration & Training now open for business*

November 9th, 2006

San Bernardino, CA —**Troxler Electronic Laboratories, Inc.**, the global leader in test and measurement equipment for the highway construction industry, announced today an agreement with **Southwest Calibration & Training**, who will represent the company as an authorized service center in Southern California. The move comes on the heels of an announcement by **Tom Akehurst**, **Troxler's** Vice President of Sales & Marketing, that the company would aggressively seek to increase its service presence in the area.

“This partnership is a statement to our customers in Southern California of **Troxler's** renewed commitment to customer service and support of our products,” said **Akehurst**. “In **Southwest's** team, we've found a talented service staff that shares our commitment to excellence, and we are proud to announce this affiliation,” he added.

Trained by **Troxler's** service team, **Southwest Calibration & Training** offers complete NIST-Traceable nuclear density gauge calibration, verification of design integrity, nuclear source safety inspection, and state-of-the-art electronic system analysis and adjustment. In addition to servicing **Troxler's** line of nuclear moisture and density gauges, **Southwest** also offers a regular training schedule which includes classes covering codes and plan reading for Concrete, Pre-stressed Concrete, and Masonry.

Southwest's principal owners **Phil Hulett** and **Dave Morgan** have designed their business model around the concepts of convenience and quality at the best possible price. “Everything, right down to the location we've chosen near the 10 and 215 freeways, is a reflection of our commitment to customer convenience,” said **Hulett**. He added, “we also offer HAZMAT-certified pick-up and delivery, so our customers can breathe easy knowing their gauges are transported safely and quickly.”

About Southwest Calibration & Training: Recently founded in the San Bernardino area, Southwest is a **Troxler-Authorized Service Center**. Using original factory-certified replacement parts, and highly-trained service technicians, the company offers top-tier servicing of Troxler nuclear moisture and density gauges.
